SUMMARY

B.Tech Computer Science graduate specializing in Flutter and Dart mobile app development, with hands-on experience in responsive UI design, state management (Provider), REST API integration, and asynchronous programming. Trained in Material Design and UI/UX best practices through professional Flutter training and academic projects. Strong problem-solver with a track record of building and shipping cross-platform apps, eager to contribute to a fast-moving product engineering team.

SKILLS

- Languages & Core: Dart, Java, SQL, Object-Oriented Programming
- Frameworks & State Management: Flutter, Provider, setState, Bloc(basics)
- Backend & Database: REST APIs, Firebase, Firebase Auth, SharedPreferences, SQL
- Tools & Platforms: Xcode, Android Studio, VS Code, Git, GitHub, Postman, CI/CD
- Architecture: MVC, Clean Architecture, Navigation, Debugging
- Other: UI/UX Principles, Responsive Design, Push Notifications (Firebase Cloud Messaging)

EXPERIENCE

Flutter Developer Training— CHETU (India) Private Limited, Noida

Jan 2026 – Apr 2026

- Built mobile apps using Flutter, and Dart with responsive, widget-based architecture.
- Integrated REST APIs, asynchronous programming (async/await, Futures), and JSON parsing.
- Managed app state using Provider and setState.
- Handled local storage, authentication, navigation, and CI/CD automated deployment workflows.
- Integrated push notifications via Firebase Cloud Messaging (FCM).

PROJECTS

Recipe Explorer App | [GitHub](#) | [Live](#)

- Built cross-platform Recipe Explorer app using Flutter, Dart, and Firebase Auth featuring persistent login state via Shared Preferences, animated splash screen, and smooth authentication flow (email/password regis and login)
- Integrated DummyJSON Recipes REST API enabling real-time recipe search by name, multi-cuisine filtering, and detailed recipe views with ingredients and step-by-step cooking instructions

FlutIQ – Flutter Interview Prep App | [GitHub](#) | [Live](#)

- Developed a responsive Flutter Q&A app with MVC clean architecture, offering 65+ interview questions across categories (Dart, State Management, Widgets) with animated splash screen and dynamic UI state handling
- Implemented real-time search, multi-category filtering, accordion expandable Q&A cards with multi-expansion support, and live stat counters using optimized Dart logic for seamless user experience

Blinkit UI Clone App | [GitHub](#) | [Live](#)

- Built a multi-screen quick-commerce UI clone using Flutter, implementing IndexedStack bottom navigation for state preservation, PopScope for smart back-button navigation, and multi-tab workflows (Home, Cart, Categories, Print Store)
- Designed a modular UI architecture using centralized theme management (Appcolors) and custom reusable widget kits (Uihelper), recreating complex e-commerce layouts including promo banners, horizontal scroll lists, and cart views

EDUCATION

Bachelor of Technology in Computer Science 2021 – 2025

HMR Institute of Technology and Management — GPA: 8.0 / 10.0
